ENWEIGH INDIA PVT. LTD.

PRODUCT LIST

- BELT WEIGH FEEDERS
- BIN/HOPPER WEIGHING SYSTEMS
- LOSS IN WEIGHT SYSTEMS
- APRON FEEDERS
- BATCHING PLANT
- SOLID FLOW METERS
- BELT WEIGHERS

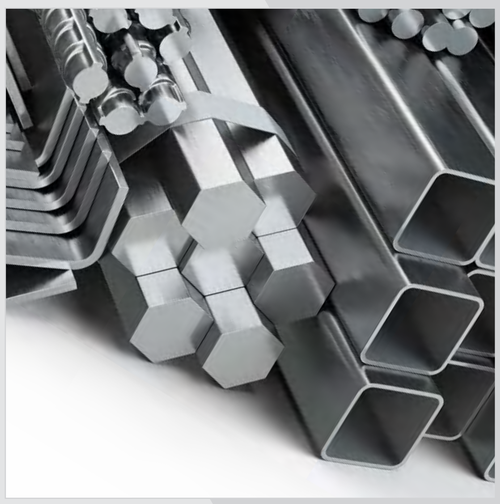

INDUSTRIES

CEMENT

STEEL

SPONGE IRON

POWER

GLASS

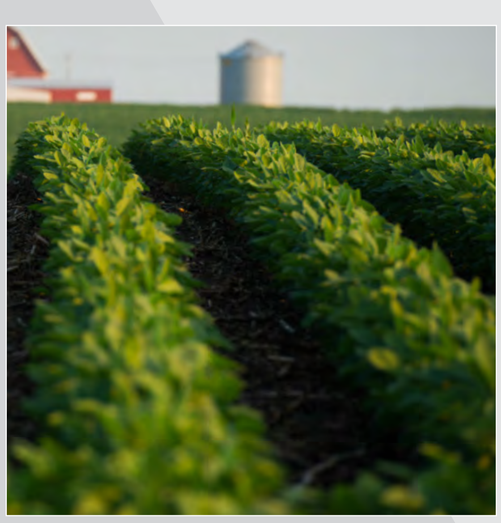

CHEMICALS

FERTILIZERS

ALLIED

ENWEIGH INDIA PVT. LTD.

INTRODUCTION

ENWEIGH INDIA PVT. LTD. develops, manufactures, and markets a full range of bulk material handling and conveying solutions, products, and systems based on combining process engineering expertise, reliable components, and field-proven technology.

Weigh Feeder @ Works

Weigh Feeder Installation at Site

With a domestic network of sites and our competent partners, the name **ENWEIGH INDIA PVT. LTD.** is synonymous throughout the country with process expertise and well-organized measuring technologies for continuous industrial weighing, feeding, conveying, and dosing technologies.

Spares, Repairs, and AMC for Bulk Material Handling Systems

Supply of Spares like Weighing Controller, DIO, AIO, Load cells, Tie Rod, Tacho Assembly, Belt, Gearbox, etc.
Modifications / Up-gradation of Existing Weigh Feeder, Loss-In-Weight System, Bin Level Measuring System, etc.

ENWEIGH INDIA PVT. LTD.

BELT WEIGH FEEDER

Enweigh Belt Weigh Feeders are designed for continuous heavy-duty environments either indoors or outdoors. The Weigh Feeders will accurately weigh any bulk solid material the conveyor will carry & will accurately control the flow rate of bulk material for product blending or process control.

Belt Weigh Feeder

CAPACITIES : From 500 kgs/hr.
BELT WIDTH : 650mm to 2400 mm
ACCURACY : Up to 0.5%
CONTROL RANGE : 1:10
ELECTRONIC SYSTEM : EUC Controller

APPLICATIONS

The Weigh Feeder is used in continuous gravimetric, proportioning of normal flowing, flushing, difficult flowing, sticky materials, and dry granular products at fixed or variable speed for various bulk materials in the process industry.

The conveying rate is controlled by a microprocessor-based automatic controller, which regulates the speed of the drive. The variation in bulk density is automatically compensated.

SOLUTIONS OFFERED

- New Installations
- Retrofit of existing Mechanical & Electrical
- Modification kit of electrical panel & control system
- Mechanical / Electrical / Controller Spares

ENWEIGH INDIA PVT. LTD.

BATCHING PLANT

We have expertise in the handling of raw materials and shards for the glass, putty, mortar, and dry mix industries. Our core expertise is therefore planning and construction of modern plants. We offer the Batching plants which are fully integrated comprehensive.

Real-time solutions are based on hardware and software platforms using contemporary technologies.

Batching Plant

Our experience and the constant endeavour for precision is the basis for excellent solutions with optimum standard, which also meets the customer's need and expectations.

ENWEIGH INDIA PVT. LTD. is in the industry for its ability to successfully conceptualize, design, erect, and commission Batching Plants.

We supply all the components required for the handling and storage of raw materials, in any variation.

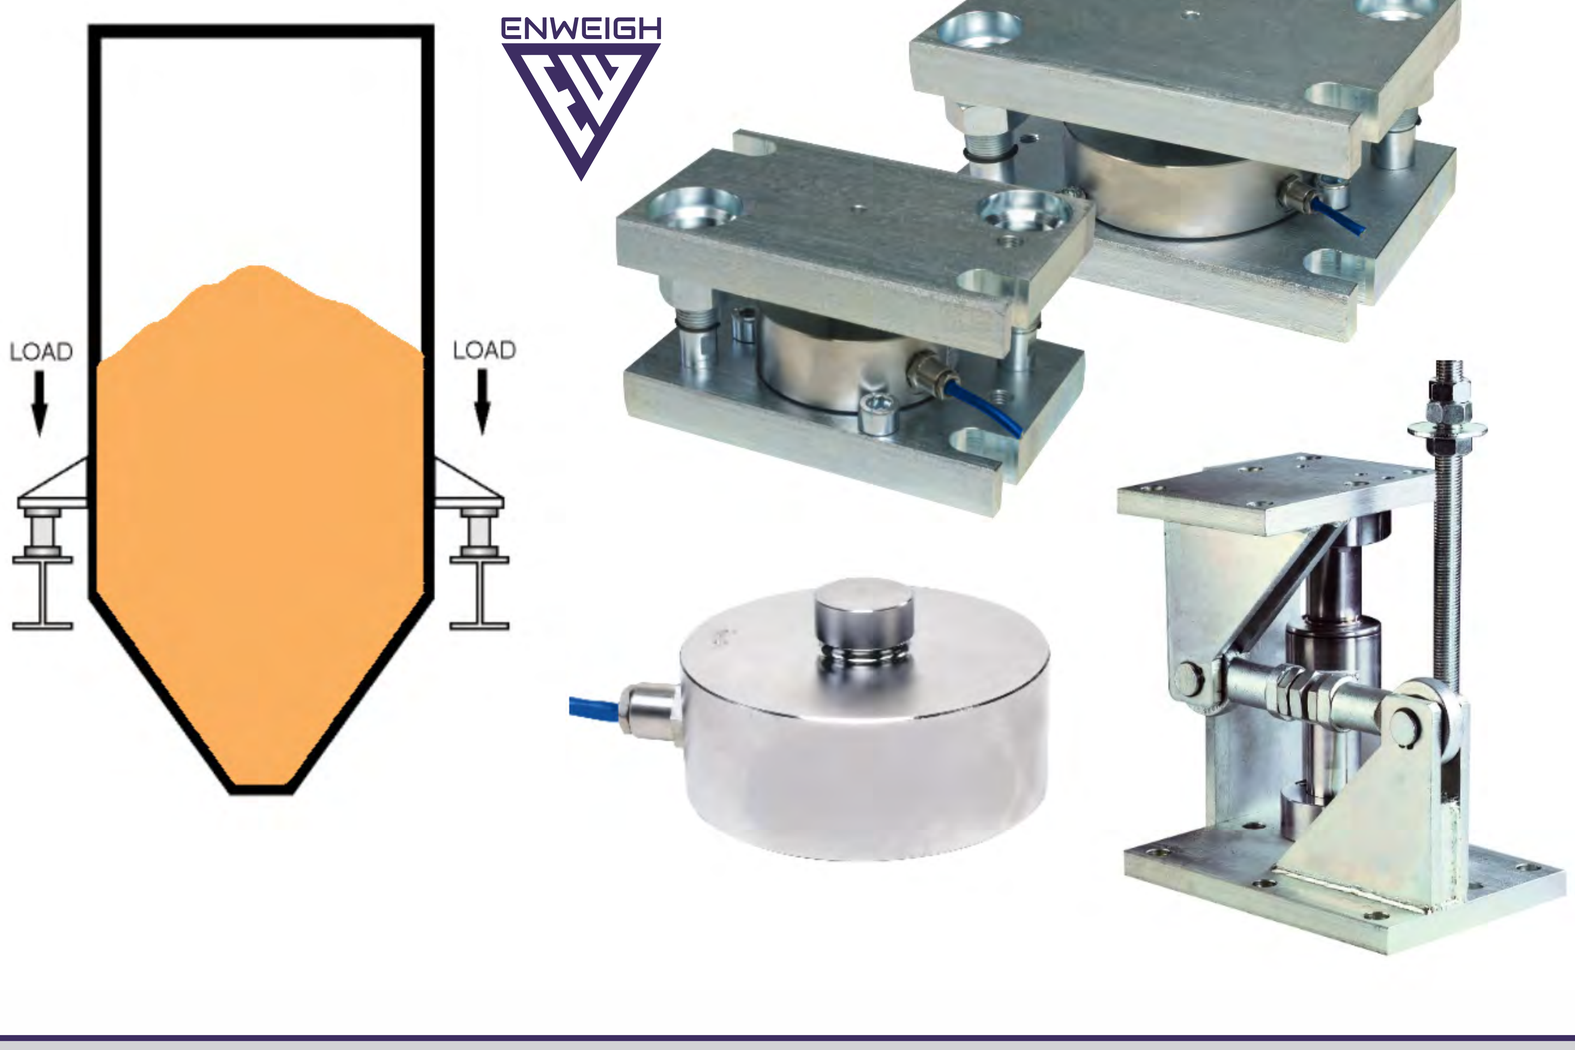

This includes various types of bin systems for the separate storage of raw materials along with dosing devices for different aggregates.

TECHNOLOGY **RELIABILITY** **SERVICE**

ENWEIGH INDIA PVT. LTD.

BIN / HOPPER WEIGHING SYSTEM

“Bin Weighing System” consists of All Live Load Cells which can achieve a system accuracy of +/-0.5%.
“Bin Level Measuring System” consist of 1 OR 2 Live Load Cell + 2 Tilt Bearing (Dummy Load Cells) which is applicable for level measuring only.

Highly accurate & maintenance-free systems that can be installed in any kind of Silo / Bin / Hopper / Tank etc.

◄ **Bin/Hopper Weighing Systems**

High-capacity weighing problems are solved simply and cost-effectively.

A System with advantages like high weighing accuracy, high protection class of load cells, applications in hazardous areas, maintenance-free, Easy to plan and integrate.

With strategic tie-ups with Load Cell OEMs for Load Cells, mounting accessories and Weigh Indicators, Enweigh India provides complete Bin Level Measuring / Bin Weighing solutions, from 5 kgs. to 3,000 tons under one roof.

Bin/Hopper Weighing Systems

Capacities

Upto 3000 Tons with 3/4 load cell systems

Electronics

EUC Controller / Weigh Indicators
